Two projects receive new energy

Zohar ceremony in Berlin-Friedrichshain and Oberschöneweide

The second half of 2022 started with our very own way of laying the foundation stones for our new projects A Laska and Wilhelmine, where we placed a Zohar in the ground of the property in Laskerstrasse and in the building foundation in Wilhelminenhofstrasse.

The Zohar is considered the most important scriptural work of Kabbalah and means „radiant shine.“

This special ceremony, at which a large part of the project team is always present, has an important meaning. We believe that a good, new space is created when positive energy is used in all planning and construction steps. At the Zohar laying, we are focused on exactly that: good energy and success for all project participants and partners, as well as for all future tenants of this place and for the community.

Thank you for your support in these important steps for the new projects and good fortune for the future.
